TECHNICAL EXCHANGE BRANCH:

Connecting People, Technology, and Mission

The ARCTOS Technical Exchange Branch, now part of DCS, plans and delivers technical conferences, symposia, and large-scale exhibitions that bring together government, industry, and academia. These events provide opportunities to share research, showcase emerging technologies, build partnerships, and address challenges across the defense and aerospace communities.

Our experienced team manages every aspect of event planning and execution—from technical program and speaker coordination to registration, exhibits, sponsorships, communications, audiovisual production, and onsite operations. Working closely with government sponsors and technical committees, we create professional forums that support meaningful exchange and collaboration.

Our portfolio includes the Aircraft Structural Integrity Program (ASIP) Conference, Defense Manufacturing Conference (DMC), Turbine Engine Technology Symposium (TETS), and other specialized technical events.

Explore our upcoming events below to learn about attending, presenting, exhibiting, or sponsoring.

Aircraft Structural Integrity Program (ASIP)
November 16-19, 2026 | San Antonio, Texas
www.asipcon.com

Composites, Materials & Structures (CMS)
March 29 - April 22, 2027 | New Orleans, LA
www.cms-conference.com

Aircraft Airworthiness and Sustainment Conference (AA&S)
April 12-15, 2027 | Dayton, Ohio
www.aasconference.com

Turbine Engine Technology Symposium (TETS)
May 8-11, 2028 | Dayton, Ohio
www.tets.us
